IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER SERVICE LINES

Este informe contiene información muy importante sobre su agua potable.
Tradúzcalo o hable con alguien que lo entienda bien.

As required by U.S. EPA, Alameda County Fairgrounds has identified that your water service connection is considered a lead status unknown service line.

The Alameda County Fairgrounds recently conducted an inventory of all water service lines, which is the pipe that connects your **building** to the water main. The purpose of the inventory is to identify the material of these service lines and fittings, including the customer-owned side of the water service line.

The pipe that connects your **building** to the water main was identified as an unknown material. Lead service lines or certain galvanized pipe can potentially place you at risk for exposure to lead. Therefore, your service line material will need to be identified.

The Alameda County Fairgrounds routinely monitors for lead in the distribution system and the most recent water sample results received on November 20, 2023 showed that the 90th percentile of all lead levels measured in the distribution system was **0 mg/L**. The action level for lead in drinking water is 0.015 milligrams per liter (mg/L) or 15 micrograms per liter (µg/L).

The most recent water sample results do not exceed the action level of 0.015 mg/L for lead.

Is my water affected?

*** If you received a separate notice instructing you to not drink, boil, or avoid drinking your water, then please continue following those instructions until you are instructed to do otherwise.**

If you **did not** receive any separate notice:

- This is not an emergency.
- Your water is safe to drink and meets federal and state safe drinking water standards.
- You do not need to use an alternative water supply (e.g., bottled water).

What about my service line?

- Because your service line is categorized as a lead status unknown composition, you can help your public water system identify your service line material.
 - EPA has developed an online step-by-step guide to help people identify lead pipes in their homes called Protect Your Tap: A Quick Check for Lead. (<https://www.epa.gov/ground-water-and-drinking-water/protect-your-tap-quick-check-lead>)
 - Other organizations have also provided tools to identify service line material, such as the LSLR

Collaborative (<https://www.lsr-collaborative.org/identifying-service-line-material.html>)

- Inform us immediately if you plan to alter or replace your service line because we may be required to replace the system portion.
- Please contact us immediately if you feel that we have incorrectly categorized the service line material.

Contact Alameda County Fairgrounds at 925-426-7656 or bwilcox@alamedacountyfair.com to inform us if your service line has been incorrectly categorized to share any information you may find about your service line, or to inform us of your plans to alter or replace your service line.

What happens next?

We received funding assistance provided by US EPA Region 9 and California State Water Resources Control Board and are working with CDM Smith to identify the remaining unknown service lines and to update the inventory.

We anticipate identifying your service line by December 31, 2026.

Lead Related Health Information

- *Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can cause new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.*
- If you have concerns about your water quality, the State Water Board's Environmental Laboratory Accreditation Program has a [map of laboratories](#) that can test your water at the consumer's expense, which can be found at: https://www.waterboards.ca.gov/drinking_water/certlic/labs/
- If you still have health concerns from potential lead exposure in your drinking water, there are point-of-use (POU) devices that can be used on your drinking water taps to provide an additional barrier of protection. A list of these residential treatment devices can be found at: https://www.waterboards.ca.gov/drinking_water/certlic/device/watertreatmentdevices.html
- If you have other health issues concerning the consumption of this water, you may wish to consult your health care provider.

Additional Resources

To verify the material of an unknown service line, for information on financial programs to assist with service line replacements or for any other information, contact Beth Wilcox at 925-426-7656 or bwilcox@alamedacountyfair.com.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this public notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by Alameda County Fairgrounds.

State Water System Number: [CA0105020](#).

Date distributed: December 18, 2025.

**Certification of Completion of Public Notification
Known or Potential Service Line Containing Lead**

Pursuant to title 40 Code of Federal Regulations section 141.85(e), water systems must notify all persons served by a known or potential service line containing lead within **30** days of completion of the initial lead service line inventory and repeat the notification annually until the entire service connection is no longer a lead, galvanized requiring replacement, or lead status unknown service line. Submit this completed form to DDW-LSLReports@waterboards.ca.gov once public notification has been accomplished.

Water System Name: Alameda County Fairgrounds

Water System Number: CA0105020

Date Notification was Issued: 12/18/2025

Notification Method(s):

- Postal mail
- Electronic mail (email)
- Direct Delivery
- Notice posted in clearly visible locations served by the water system, where direct notification is not possible (i.e. renters, healthcare facilities, restaurants, correctional facilities, etc). Describe location below (attach a list of locations if needed):

Posted in both RV North and RV South laundry facilities along with the RV office.

- Other method used to notify consumers:

Notice uploaded to our website.

Attach a copy of the public notice distributed to the water system's customers.

I hereby certify that the above information is factual.
